

VENUS V-44+ FFP1

-
- VENUS V-44+ FFP1 S IS 9473:2002 Approved Respirator
 - Filtering efficiency > 80% against solid particles Complies ISI test requirements based on IS 9473:2002 by BIS
 - High technology filter media with micro fine fibers & electrostatic charge gives maximum filtering efficiency
 - Comfort Fold Flat Style filtering face piece produced substantially of filter media to fit on the face covering the nose and mouth comfortably so that fine particles does not enter from the edges.
 - Low profile design, fits wide range of face contours
 - Light weight provides greater work comfort, suits longer duration of wear
 - Compatible with / other face / head PPE(s)
 - Protection against Solids particles & non oil based Liquids particles from sprays - tested for mean particle size of 0.6 Microns as per IS 9473 2002 Standards

VENUS V-410-V FFP1 S

-
- VENUS V-410-V FFP1 S IS 9473:2002 Approved Respirator
 - Filtering efficiency : > 80 %against Solid particles, Complies ISI test requirements based on IS 9473:2002 by BIS
 - Filter Media : High technology filter media with micro fine fibers & electrostatic charge gives maxi-mum filtering efficiency
 - Comfort Fold Flat Style filtering face piece produced substantially of filter media to fit on the face covering the nose and mouth comfortably so that fine particles does not enter from the edges.
 - Large surface area to suit breathing comfort and high protection. Low profile design, fitting wide range of face contours
 - Light weight provides greater work comfort, suits longer duration of wear
 - Compatible with / other face / head PPE(s)
 - Protection against Solids particles & non oil based Liquids particles from sprays - tested for mean particle size of 0.6 Microns as per IS 9473 2002 Standards

V-420 SLV FFP2 NR

-
- VENUS V-410-V FFP1 S IS 9473:2002 Approved Respirator
 - Filtering efficiency : > 80 %against Solid particles, Complies ISI test requirements based on IS 9473:2002 by BIS
 - Filter Media : High technology filter media with micro fine fibers & electrostatic charge gives maxi-mum filtering efficiency
 - Comfort Fold Flat Style filtering face piece produced substantially of filter media to fit on the face covering the nose and mouth comfortably so that fine particles does not enter from the edges.
 - Large surface area to suit breathing comfort and high protection. Low profile design, fitting wide range of face contours
 - Light weight provides greater work comfort, suits longer duration of wear
 - Compatible with / other face / head PPE(s)
 - ♦ Protection against Solids particles & non oil based Liquids particles from sprays - tested for mean particle size of 0.6 Microns as per IS 9473 2002 Standards

V-420 SLV FFP2 NR

- VENUS V-420-SLV FFP2 EN 149 : 2001 + A1: 2009 Approved Respirator
- Filtering efficiency >94% against Solid & Liquid particles Complies EC type test requirements based on EN 149:2001 by European notified body, IFA (0121), Germany
- Filter Media : High technology filter media with micro fine fibers & electro static charge gives maximum filtering efficiency
- Comfort Fold Flat Style filtering face piece produced substantially of filter media to fit on the face covering the nose and mouth comfortably so that fine particles does not enter from the edges.
- Large surface area to suit breathing comfort and high protection.
- Low profile design, fitting wide range of face contours
- Light weight provides greater work comfort, suits longer duration of wear
- Can be easily worn with / other face / head PPE's
- Solid particles & non oil based Liquid particle
- Tested for mean particle size of 0.6 microns as per CE Norms
- Protection against oil based particles - tested for mean particle size 0.6 micron as per CE Norms

VENUS V-20-V FFP2 S

-
- VENUS V-420-SLV FFP2 EN 149 : 2001 + A1: 2009 Approved Respirator
 - VENUS V-20-V FFP2 S IS 9473:2002 Approved
 - Filtering efficiency : > 94% against Solid particles Complies ISI test requirements based on IS 9473:2002 by BIS & DGMS Approved.
 - High technology filter media with micro fine fibers & electrostatic charge gives maximum filtering efficiency Coarse Pre filter thick pad for slow clogging on filter media
 - Cup Style filtering face piece produced substantially of filter media to fit on the face covering the nose and mouth comfortably so that fine particles does not enter from the edges.
 - Large surface area to suit breathing comfort and high protection.
 - Low profile design, fits wide range of face contours
 - Light weight provides greater work comfort, suits longer duration of wear
 - Compatible with / other face / head PPE(s)
 - Solid particles & non oil based Liquid particle from sprays tested for mean particle size of 0.6 microns as per IS 9473 2002 Standards

VENUS V-425 SLOV-V FFP2 NR

-
- VENUS V-420-SLV FFP2 EN 149 : 2001 + A1: 2009 Approved Respirator
 - VENUS V-20-V FFP2 S IS 9473:2002 Approved
 - Filtering efficiency : > 94% against Solid particles Complies ISI test requirements based on IS 9473:2002 by BIS & DGMS Approved.
 - High technology filter media with micro fine fibers & electrostatic charge gives maximum filtering efficiency Coarse Pre filter thick pad for slow clogging on filter media
 - Cup Style filtering face piece produced substantially of filter media to fit on the face covering the nose and mouth comfortably so that fine particles does not enter from the edges.
 - Large surface area to suit breathing comfort and high protection.
 - Low profile design, fits wide range of face contours
 - Light weight provides greater work comfort, suits longer duration of wear
 - Compatible with / other face / head PPE(s)
 - Solid particles & non oil based Liquid particle from sprays tested for mean particle size of 0.6 microns as per IS 9473 2002 Standards

VENUS V-430-SLV FFP3

-
- VENUS V-430-SLV FFP3 NR EN-149-2001 + A1: 2009 Approved Respirator
 - Filtering efficiency > 99% against Solid & Liquid particles Complies EC type test requirements based on EN 149:2001 by European notified body, IFA (0121), Ger-
 - High technology filter media with micro fine fibers & electro static charge gives maximum filtering efficiency
 - Comfort Fold Flat Style filtering face piece produced substantially of filter media to fit on the face covering the nose and mouth comfortably so that fine particles does not enter from the edges.
 - Large surface area to suit breathing comfort and high protection.
 - Low profile design, fitting wide range of face contours
 - Light weight provides greater work comfort, suits longer duration of wear
 - Compatible with / other face / head PPE(s)
 - Protection against solid Liquid or oil based particles - tested for mean particle size 0.6 micron as per CE Norms

V-4400 N95

-
- VENUS V-4400 95 NIOSH "42 CFR 84" N95 Approved
 - Filtering efficiency - > 95% solid particles NIOSH "42 CFR 84" N95 requirements
 - High technology filter media with micro fine fibers & electrostatic charge gives maximum filtering efficiency
 - Universal Fold Flat Style filtering face piece produced substantially of filter media to fit on the face covering the nose and mouth comfortably so that fine particles does not enter from the edges.
 - Large Face coverage
 - Embedded Nose clip& Sealed edges
 - Light weight provides greater work comfort, suits longer duration of wear
 - Compatible with / other face / head PPE(s)
 - Protection against solids particles.

Venus Microfibre V-500+7500

-
- A1E1 P1S Half Face Mask And Organic Vapor/Acid Gas Cartridge, Black
 - Venus v-500 half face mask reusable respirator helps provide protection against particulates and a wide variety of gases and vapors when used with approved v-7500 single cartridge filters.
 - Medium size version included, 1 filters inside the pack
 - V-500 half face mask and v-7500 filter cartridge are is14746 approved for protection against certain organic vapors or acid gases.
 - 4 point adjustable elastic band with front pull strap on v-500 mask distributes weight evenly and provides comfortable fit.
 - Lightweight elastomeric material for comfort during long periods of work, screw type filter fitting is easy to use.

Venus Safety V-800+7800

- Venus Safety V-800+7800 Dual Half Mask with Rubber Multipurpose ABEK Cartridge
- Durable adjustable elastic bands
- Exhalation vent valve
- Produced from soft thermoplastic elastomer

Venus V668 Full Face Mask

- Produced from natural neoprene rubber - Easy to use & maintain
- Zero power hard coated Visor - Polycarbonate lense meet impact test test requirement for face protection, high clarity & durability
- Inner Face Piece - Prevents fogging on the Visor, Neck strap - For easy handling
- Speech Diaphragm - Promotes easy communication

- Best designs, High quality, Safe and reliable

Jld Breathing Apparatus With Cfk Cylinder

- CABA 9500 with CFK Cylinder 6 lit x 300 bar.
- Compressed Air Breathing Apparatus, positive pressure type essentially consisting of the following components
- Carrying plate with straps
- Pressure Reducer (Pressure Compensated with audio
- alarm : Reserve air (Signal)
- Pressure gauge indicates Cylinder Pressure
- Compressed gas (Single CFK Cylinder 6L/300 bar)
- Lung Demand Valve (Balanced Piston Type) - Protect 2000 plug-in series Full face mask
- Approved to IS: 10245(part II):1994; ISI Mark license No. CM/L 7516070
- Mask approved to IS 14166: 1994 ISI mark License no.CM/L-7880394
- Part No: D-9001 (B)
- With LUXFER Imported PESO(CCOE)Approved Cylinder with tekno valve having 200/300bar pressure 6 Ltrs water capacity APPROVALS: As market leaders in the field of respiratory protection, current and anticipated standards are incorporated in the design criteria for the premier range.
- Approved to EN 137 Type II
