

Fiberglass Self-supported Ladder

- Extra heavy duty step ladder for all industrial applications.
- Moulded top with Recess tray: Nonconductive Structural moulded top, with slots help to keep tools close at hand.
- Inside Spreader Braces
- Aluminium Feet with Slip Resistant thick rubber tread.
- Full Channel Fiberglass
- Heavy Gusset Bracing: Two pairs of gusset support at the bottom step. All gussets are heavy duty steel.

Fiberglass Self Supported Two Way Ladder

- Two side mechanical step ladder is designed as trestle ladder for entry from either side. Nonconductive fiberglass rail with fully serrated aluminium steps on front & back.
- Heavy Gauge Steel Hinges: Suitable for industrial application.
- Heavy Gusset Bracing: Two pairs of gusset support at the bottom step. All gussets are heavy duty steel.
- Pinch proof Spreader Braces: Heavy duty plated steel spreader braces with double rivet hinge - these protect the user from pinched fingers.
- Full Channel of Fiberglass: Nonconductive full channel rails with polyester veil.
- Slip Resistant Rubber Feet: Aluminum feet with thick rubber tread.
- Inside Spreader Braces

Fiberglass Wall Supported Platform

- Extra heavy duty 300lbs rated, shelf ladder for all industrial application. Steps are level when the ladder is set at 18 Degree. Nonconductive fiberglass side rail with fully serrated aluminium step.
- Rubber Bumper: Thick rubber of 6" length parallel to sides of ladder.
- Heavy Gusset Bracing : Two pairs of gusset support at the bottom step. All gussets are heavy duty steel.
- Slip Resistant Rubber Feet: Aluminum feet with thick rubber tread

Fiberglass Self Supported Platform

- Fiberglass platform ladder designed for prolong standing at one height. Nonconductive fiberglass rail with fully serrated aluminium step & platform.
- Slip Resistant Platform: Large fully serrated platform 15" wide 20" deep, it locks ladder.
- Heavy Gusset Bracing: Two pairs of gusset support at the bottom step. All gussets are heavy duty steel.
- Slip Resistant Rubber Feet: Aluminium feet with thick rubber tread.
- Top Rail Guard: To serve as a railing for working from platform.
- Option of castor, handrails, foldable platform.

Fiberglass Step Stand Ladder

- These multipurpose, heavy duty industrial domestic step stands are available as light weight, non-conductive fiberglass step stand.
- Large Moulded Top: Nonconductive moulded top. 14" wide & 10" deep.
- Heavy Gusset Bracing: Two pairs of gusset support at the bottom step. All gussets are heavy duty steel.
- Slip Resistant Rubber Feet: Aluminium feet with thick rubber tread.

Fiberglass Extension / Telescopic Ladder

- Heavy Duty channel extension ladder for all industrial application, Full channel nonconductive side rails. Set ladder at the proper working angle.
- Round Fully Serrated Tempered Rungs. Rungs are connected with Plates.
- Easy one handed locking system.

- Swivel Safety Shoes Aluminum Shoe with thick rubber treads.
- Full Channel Fiberglass Channel Nonconductive

Fiberglass Mobile Platform Ladder

This mobile maintenance platform is specially designed for working around electricity, its non-conductive material & heavy duty construction provides safety on jobs where electrical lines are present.

- Heavy Duty anti skid step assembly.
- Non conductive Platform Assembly.
- Heavy Duty Base Assembly.
- Non Conductive Handrail & Guard Rail
- SafetyLock Feature with Handle for Wheel Engagement.
- Safety Yellow Color.

Fiberglass Maintenance Platform Ladder

- A narrow fiberglass Straight ladder design for use in manholes. Full Channel nonconductive side rails. Width of all sizes is 14".
- Round Fully Serrated Tempered Rungs.
- Optional Rail Protector can be ordered with durable rail guards to protect the side rail from metallic rim of manhole.
- Safety Shoes Aluminium Shoe with thick rubber treads.
- Full Channel Fiberglass Channel Nonconductive

Fiberglass Manhole Ladder

- A narrow fiberglass Straight ladder design for use in manholes. Full Channel nonconductive side rails. Width of all sizes is 14".
- Round Fully Serrated Tempered Rungs.

- Optional Rail Protector can be ordered with durable rail guards to protect the side rail from metallic rim of manhole.
- Safety Shoes Aluminium Shoe with thick rubber treads.
- Full Channel Fiberglass Channel Nonconductive

Fiberglass Mobile Telescopic Platform Ladder

- This ladder is designed for working on street light application.

Fiberglass Mobile Telescopic Tilting Ladder

- This ladder is designed for working on street light application

Aluminium Double Step Trestle Ladder

Double Step Trestle Ladders are manufactured from high tensile aluminium alloy. These ladders are widely used in industries, homes, offices, shops. These ladders are with rungs on both sides.

- Two people can safely work simultaneously
- A ladder with rungs on both sides
- Light weight-easily carrying by one person
- Sides : Channel Section 2 5/8" X 1 1/4" Dia. Approx
- Rungs : 1" Dia.
- Non-Slip Corrugated Tubing at 10"/12" Center to Center or as suitable.
